DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 21, 22 and 46 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 4,326,098 to Bouricius et al.

As per claims 1, 21, 22 and 46, Bouricius et al. discloses the limitations of these claims (see at least the abstract).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bouricius et al. as applied to claims 1, 21, 22 and 46 above, and further in view of the examiner taking official notice.

Application/Control Number: 09/956,942

Art Unit: 2132

As per claim 2, Bouricius et al. do not specifically disclose the limitations of this claim. The examiner, however, takes official notice that these features are well known in the art. It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to have included these features in the invention of Bouricius et al. since communication over a public network is a common means of transmitting information and data provided security protocols are in place to safeguard the sensitive information.

Allowable Subject Matter

Claims 27, 32-45 are allowed.

Claims 3-20, 23-26, 28-31, 47-50 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas R. Peeso whose telephone number is 571 272-3809. The examiner can normally be reached on Mon.-Fri, 7:00 a.m. to 3:30 p.m. The central fax number for the office is 571 273-8300.

Art Unit: 2132

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron, can be reached on 571 272-3799.
